

KING RESEARCH GROUP

AI STOCKS POWER PLAY

TOP 7 AI STOCKS RANKED

INDEPENDENT EDUCATIONAL RESEARCH - NOT PERSONALIZED INVESTMENT ADVICE

OUR PUBLISHING STANDARD

THE KING RESEARCH GROUP STANDARD.

THE STANDARD BEHIND EVERY POWER PLAY.

This report is built around one rule: the answer should be clear enough to use - and honest enough to trust.

We will not bury the ranking. We will not pretend risk does not exist. We will not ask you to take our word for it.

Every call has a reason, a danger, a next proof point and a condition that breaks the case.

When the facts change, the ranking changes.

KING RESEARCH GROUP

INDEPENDENT EDUCATIONAL RESEARCH

KNOWLEDGE IS LEVERAGE.

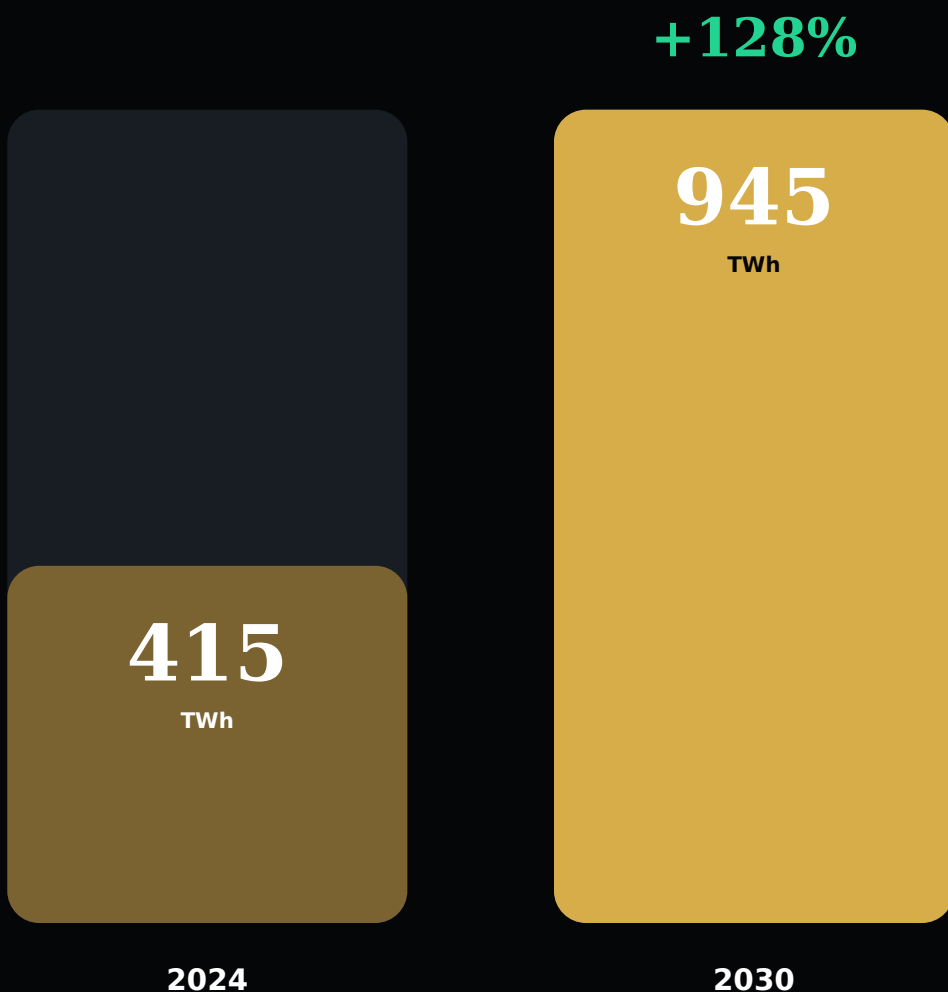

RESEARCH CUT-OFF: AUGUST 17, 2026. WHEN THE FACTS CHANGE, THE RANKING CHANGES.

THE BUILDOUT

AI NEEDS MORE POWER. A LOT MORE.

Data centres run on electricity. By 2030 they need more than twice as much. Somebody has to supply it.

AI IS THE MAIN DRIVER OF THE INCREASE.

Projection, not a guarantee. 2030 is the IEA Base Case.

Source: International Energy Agency, Energy and AI (2025).

POWER

HOW TO USE IT

READ THE CALL. RESPECT THE RISK.

Four words. Four levels of conviction.

LEADER

Best current mix of quality, evidence and price.

POWER / STRONG

Elite business. Demand proof is strong.

WAIT / WATCH

Great story. Price or execution needs proof.

CYCLE

Upside can be huge. So can the reversal.

THE RULE **Price means nothing if the facts break.**

YOUR SEQUENCE

SIX MOVES. NO GUESSING.

A process for using the ranking - not a command to buy.

01

READ THE ORDER

Know who leads and who still needs proof.

02

READ WHY IT WINS

Understand the one advantage carrying the case.

03

FACE THE DANGER

If you cannot accept the downside, stop.

04

CHECK THE NEXT PROOF

Know the result, order or milestone that matters next.

05

RESPECT THE BREAK

If the break condition hits, rebuild the case from zero.

06

VERIFY THE DATE

Prices and facts move. Confirm current information before acting.

THE REPORT GIVES YOU A SYSTEM. THE DECISION REMAINS YOURS.

THE KILL LIST

WHAT CAN BREAK THE AI TRADE?

Strength without downside discipline is just ego.

CAPEX BREAKS

Hyperscalers slow spending before revenue catches up.

POWER STALLS

Grid, generation or cooling delays stop deployment.

POLICY HITS

Export limits remove demand or block critical tools.

SUPPLY FLOODS

Capacity catches demand and pricing power collapses.

VALUATIONS SNAP

Great companies fall when expectations become impossible.

THE KING DOES NOT IGNORE THE EXIT.

METHOD

HOW THE RANKING IS BUILT.

Simple on the surface. Hard work underneath.

01

POWER

Does the company control something AI cannot easily replace?

02

PROOF

Do revenue, margins, orders and cash support the story?

03

PRICE

How much future success is already assumed?

04

RISK

What can permanently damage the case?

05

CHANGE

What new fact would move the rank?

Ranking is editorial judgment, not a mechanical score or personalized recommendation.

RESEARCH CUT-OFF: AUGUST 17, 2026. WHEN THE FACTS CHANGE, THE RANKING CHANGES.

EDUCATION, NOT PERSONAL ADVICE

This report is general educational research. It does not consider your objectives, finances, risk tolerance or tax situation.

RISK IS REAL

Stocks can fall sharply or lose all value. AI-related securities can be volatile, concentrated and sensitive to policy, competition and capital spending.

NO GUARANTEE

Rankings, scenarios and judgments are opinions as of the research cut-off. They may be wrong. Past performance does not guarantee future results.

CHART CONTEXT

Industry forecasts are projections. Company growth periods differ and are not directly comparable.

VERIFY BEFORE ACTING

Use current filings, prices and professional advice where appropriate. Never risk money you cannot afford to lose.
